

22" ACW BEAUTY DISH WHITE

Code no. 8607

- // The metal body is designed to accommodate a large honeycomb with a diameter of 22"/56 cm. This makes targeted light possible and increases the possible applications.
- // The metal honeycomb clicks into the edge of the reflector and is held in place by two metal clips for simple handling and effective performance
- // The deflector can be replaced by a 7" metal honeycomb
- // The Beauty Dish generates round, natural eye reflexes
- // Ideal for portraits, weddings, beauty, fashion, nursery and school photography
- // Robust enough for outdoor use
- // The ideal keylight when combined with reflecting screens
- // Lightweight aluminium construction with low weight and low area to be caught by the wind
- // None of the assembly work required for softboxes.
- // Particularly recommended for Integra Plus compact flashes and EH Pro Mini flash heads
- // Accessories can be changed without tools in seconds
- // Transportable with all the bits and bobs in a sturdy transport bag

Applications:

- // ACW + deflector = soft light with wide angle dispersion
- // ACW + deflector + 22" honeycomb = accentuated, targeted light with narrow diffusion angle and soft flow out towards the edges
- // ACW + 7" honeycomb = clearly accentuated, targeted light in the middle and clear flow out towards the edges
- // ACW + 7" honeycomb + 22" honeycomb = clearly accentuated, targeted light in the middle and extreme flow out towards the edges

Optional accessories:

The light characteristics can also be influenced using diffusers or colour filters, which can be used in the 7" format in the filter holder provided. A range of four different 7" honeycombs and two 22" honeycombs increases the possibilities even further.
